

PROFILE SUMMARY

With over 11 years experience in the market and approximately Eight (9) plus years of documented employment experience, I have been able to touch and implement crucial business strategies, methods, tools impacting strategic operations for project or operations delivery.

My experience ranges from Team Member, Supervisory, Consulting, and Executive roles in Sales, Operations, and Support for Retail, IT Hardware and Software, BPO industry, Bullion, and Education. During my tenure, I have been able to deliver w.r.t. Service Delivery (Operations/ Accounts), Team, Quality, and other Organizational metrics and strategies. I have been recognized for the same during my tenure in different organizations.

I have had the opportunity to touch atleast 6 domains and have been in critical, and/or strategic roles in some of these profiles. I also have had the opportunity to transition, scale projects and organizations while handling strategic activities as well as delivery operations roles during my tenure.

W.r.t technical skills and software development, I have been able to work as an individual contributor developing, training, and supporting Javascript technologies, design patterns, architectures, and different concurrency requirements. In this role, I have also been able to manage Project Management roles managing project/business requirements along with project teams.

I look forward to working long term with growth oriented organizations in crucial, challenging, and mutually beneficial roles.
